

VPN on Windows 7

From the **Start Menu** select **Control Panel**

Select: **Network and Sharing Center**

View your basic network information and set up connections

WA17 (This computer) — Multiple networks — Internet [See full map](#)

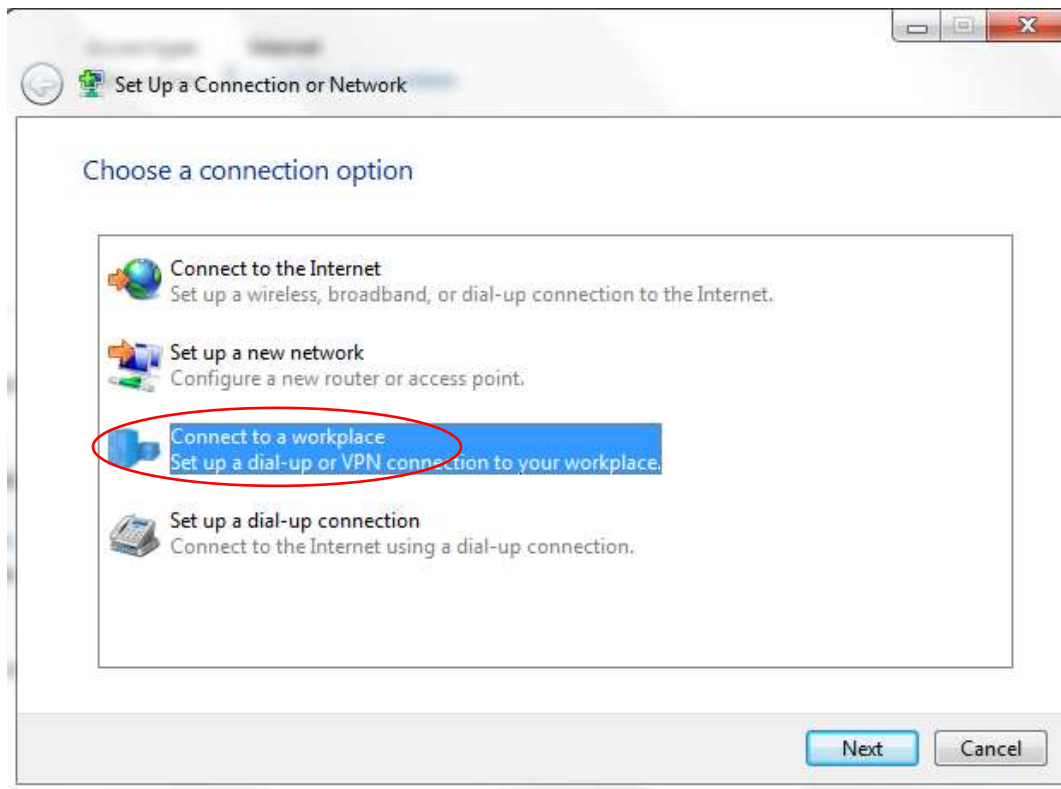

View your active networks [Connect or disconnect](#)

 Network 5 Work network	Access type: Internet Connections: Local Area Connection
 Network 4 Work network	Access type: Internet Connections: Local Area Connection 2

Change your networking settings

-  [Set up a new connection or network](#)
Set up a wireless, broadband, dial-up, ad hoc, or VPN connection; or set up a router or access point.
-  [Connect to a network](#)
Connect or reconnect to a wireless, wired, dial-up, or VPN network connection.
-  [Choose homegroup and sharing options](#)
Access files and printers located on other network computers, or change sharing settings.

Select: **Set up a new connection or network**

The screenshot shows a Windows wizard window titled "Set Up a Connection or Network". The main heading is "Choose a connection option". There are four options listed, each with an icon and a description:

-  **Connect to the Internet**
Set up a wireless, broadband, or dial-up connection to the Internet.
-  **Set up a new network**
Configure a new router or access point.
-  **Connect to a workplace**
Set up a dial-up or VPN connection to your workplace.
-  **Set up a dial-up connection**
Connect to the Internet using a dial-up connection.

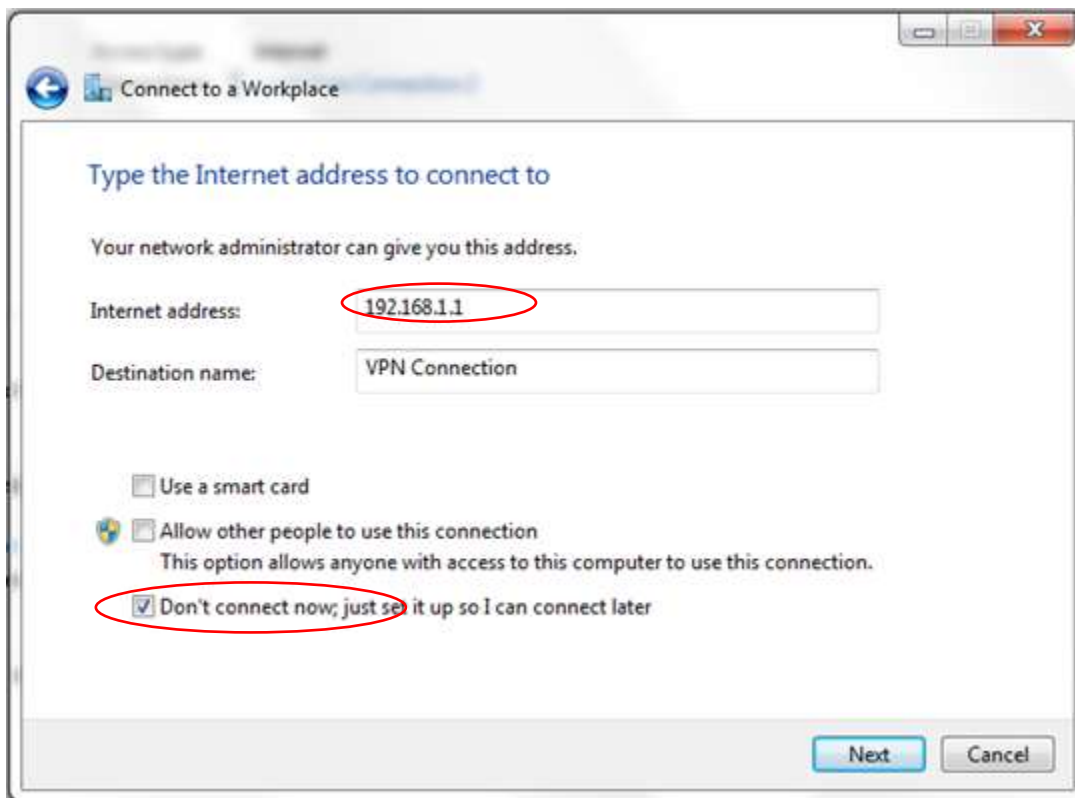

At the bottom of the window, there are two buttons: "Next" and "Cancel". The "Connect to a workplace" option is highlighted with a blue background and a red circle around it.

Select: **Connect to a workplace**

Select: **Next**

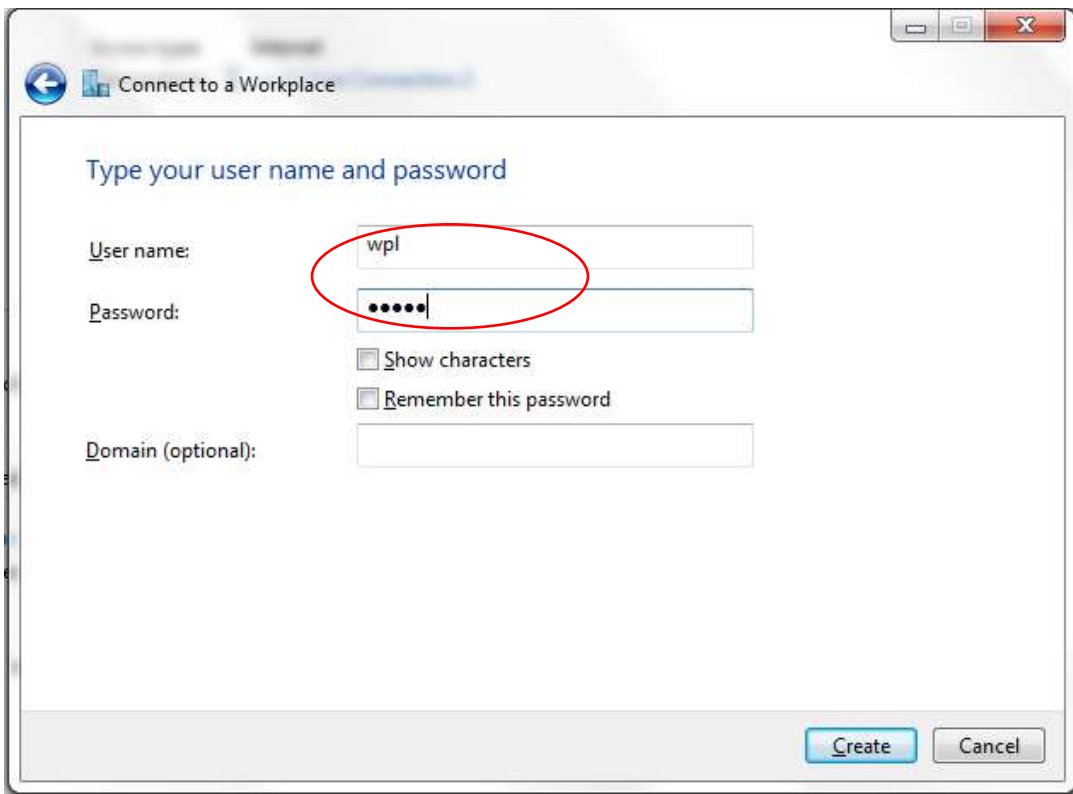

Select: **Use my Internet connection (VPN)**

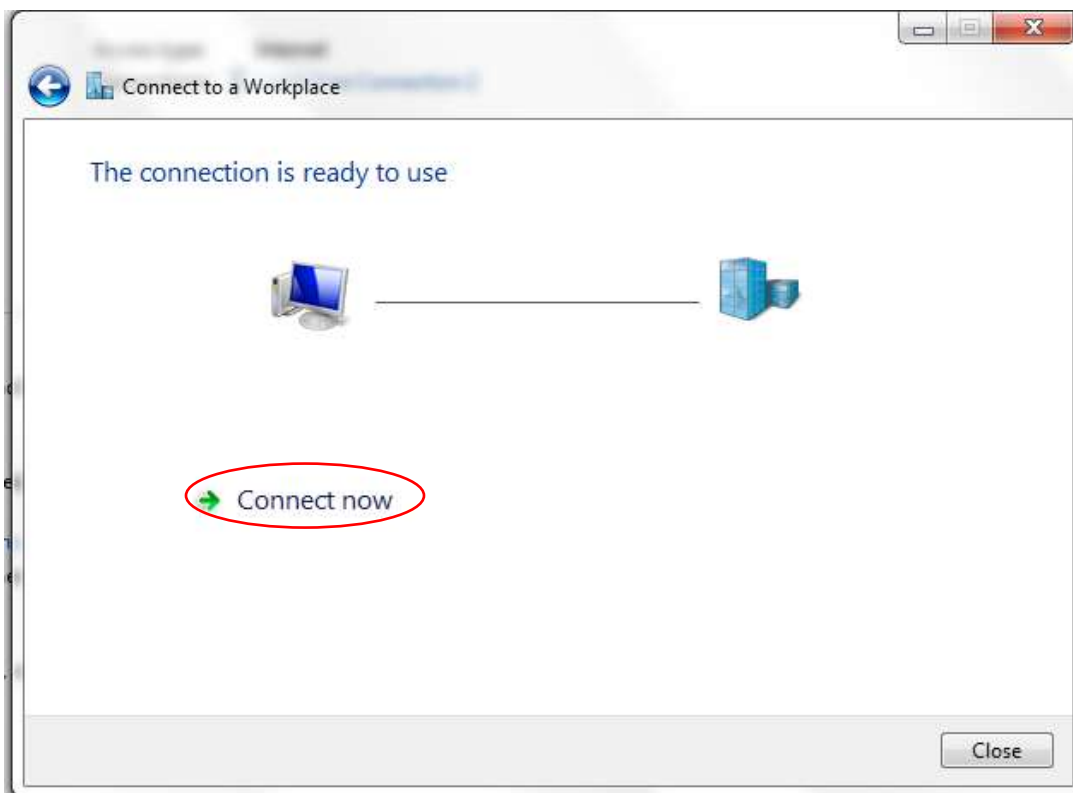

Enter the following IP Address: **192.168.1.1**

Check the box for **Don't connect now**

Click **Next**

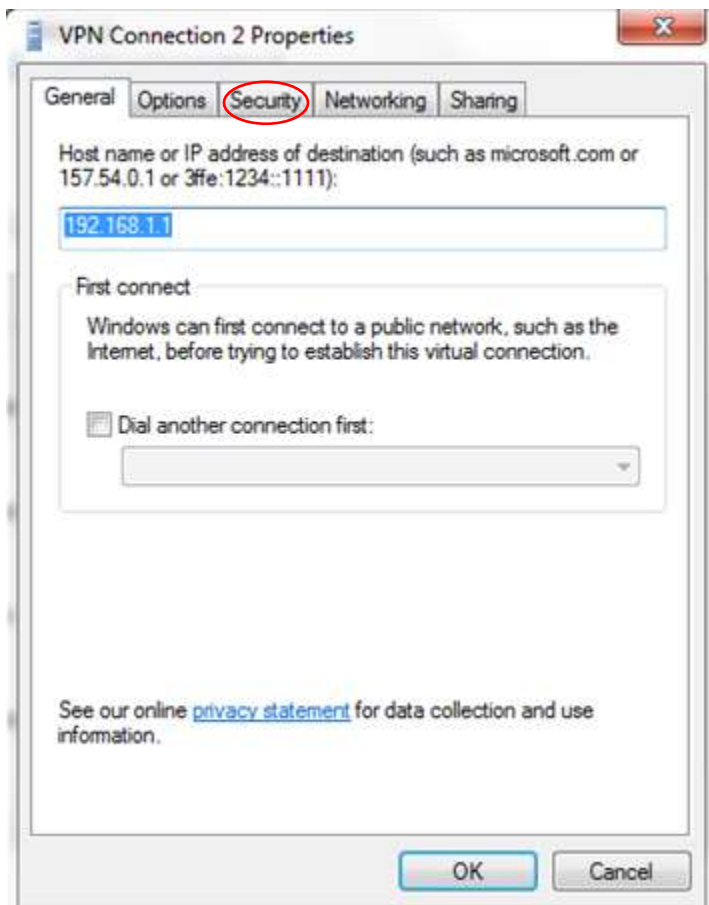

Username: **wpl**
Password: **books**
Click: **Create**

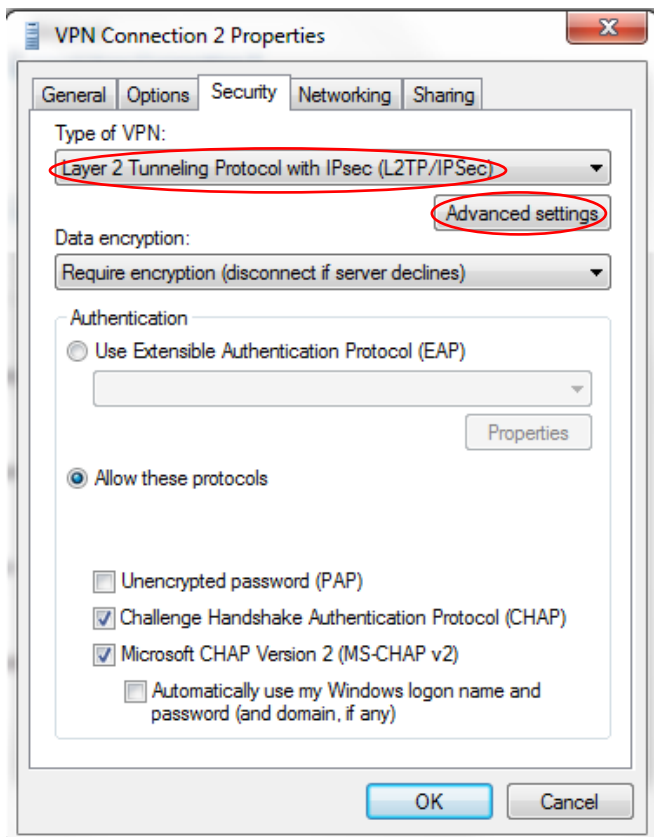

Click: **Connect now**

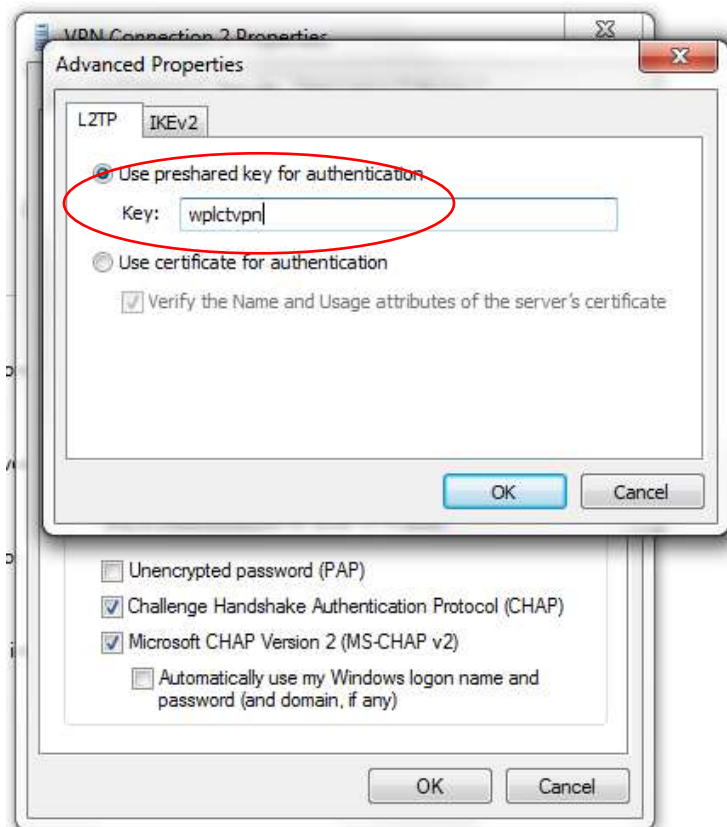

Click: **Properties**

Click: **Security**

Type of VPN: **Layer 2 Tunneling Protocol with IPsec (L2TP/IPSec)**
Click: **Advanced Settings**

Select: **Use preshared key for authentication**
Enter Key: **wp!ctvpn**
